

# Nero™ | Frameless Glass Showers

## NERO IS A SYSTEM OF FRAMELESS GLASS SHOWERS THAT ARE ABLE TO BE CUSTOM DESIGNED TO CREATE A STUNNING AESTHETIC.

Woods Glass take care of the whole process from design to engineering to install.

Nero showers are custom built using toughened safety glass with special hinges, channels and brackets to ensure all the safety standards are met.

In recent times low iron glass is used for clarity and Revita self cleaning glass to keep the glass clean. Special effects are possible with Keramo ceramic fritted glass, tinted glass and our range of Obscure glass.

### APPLICATIONS

Multi story residential buildings  
Hotels  
Gymnasiums

### PERFORMANCE/ SPECIFYING

Nero Frameless showers are designed using Grade A safety glass to ensure any breakages do not cause injury. Nero systems must be engineered to specific code and design, please contact Woods Glass to find out more information.

### CLEANING/ MAINTENANCE

Normally when cleaning glass, a vinegar-based glass cleaner or mild dish soap and water with a soft, lint-free cloth or paper products is recommended. A squeegee or soft cloth may be carefully used to dry the glass and help avoid water spots.

It is not recommended to use petroleum-based cleaners or solvents as they can streak the glass and weaken the seal between the glass and frame. Avoid washing in direct sunlight to reduce streaking on the glass.

Never use razor blades, steel wool, putty knives or abrasive pads as they may damage the glass, particularly on toughened glass.

### RANGE

Nero can be combined with a range of Woods Glass products such as ceramic fritted glass (Keramo), obscure privacy glass (Obscura) and ultra clear glass (UltraVis) for improved performance and aesthetics. Please contact Woods Glass to discuss special requirements.

### BUILDING CODES

NZS 4223.1 'Glazing in buildings - Glass selection and glazing',

NZS 4223.3 'Glazing in buildings - Human impact safety requirements',

AS/NZS2208 - Building safety glazing materials

AS 1170.2 - Structural design actions  
Wind actions

### GLASS TYPES

Laminate  
Ceramic Frit  
Self Cleaning  
Low Iron  
Obscure
