

Auto Doors | Automated Sliding Doors

AUCKLAND: 09 525 3379 | WELLINGTON: 04 913 1999 | CHRISTCHURCH: 03 366 3733

THE INCORPORATION OF AUTOMATED SLIDING DOORS INTO FAÇADES, ENTRYWAYS OR FOR INTERNAL SECURITY IS AN EFFECTIVE WAY OF PROVIDING A GLAZED, HYGIENIC, AUTOMATED ENTRY.

Whether activated by sensor or card access, these doors are a reliable solution. Woods Glass procure high quality and reliable equipment and work closely with our suppliers to ensure the right solution is delivered,

including emergency exit requirements and integration with other activation equipment. Integrating the structural solution into the curtainwall is a possibility, thus minimising the need for additional structure.

APPLICATIONS

Offices
Commercial Buildings
Apartments

PERFORMANCE/ SPECIFYING

Auto Doors can come as toughened or laminate so can be used in high impact areas. All glass must be engineered to specific code and design. Many different tints are available so please contact Woods Glass to find out more information.

CLEANING/ MAINTENANCE

Commercial buildings are issued a compliance schedule from the council if the building has any specified systems at the completion of works. Auto Doors require regular checks and inspections to ensure they comply with the statutory regulations.

Normally when cleaning glass, a vinegar-based glass cleaner or mild dish soap and water with a soft, lint-free cloth or paper products is recommended. A squeegee or soft cloth may be carefully used to dry the glass and help avoid water spots.

It is not recommended to use petroleum-based cleaners or solvents as they can streak the glass and weaken the seal between the glass and frame. Avoid washing in direct sunlight to reduce streaking on the glass.

Never use razor blades, steel wool, putty knives or abrasive pads as they may damage the glass, particularly on toughened glass.

RANGE

Auto Doors are highly customizable and each system is bespoke. Woods Glass design and engineer each system, so please get in touch to find out more. Please contact Woods Glass to discuss special requirements.

BUILDING CODES

NZS 4223.1 'Glazing in buildings - Glass selection and glazing',
